

- **gogent**

A Go framework for LLM agents with built-in OpenTelemetry observability

[Github](#)

- Built a Go agent framework with ReAct, plan-and-execute, typed tools, graph routing, and guardrails.
- Unified Anthropic, OpenAI, Google, Bedrock, MCP, and A2A behind provider-neutral interfaces.
- Added OpenTelemetry tracing, a SQLite span store, an SSE dashboard, and CLI run replay.
- Benchmarked 240ns zero-allocation node transitions and 8.7 microseconds tracing overhead per provider call.
