

- **Smart Email Assistant**

AI-assisted email reply system with a Java Spring Boot API, React client, and Gmail extension

[Github](#)

- Built a Java 17/Spring Boot 3 REST API that generates tone-aware email replies through Gemini from structured prompts.
- Encapsulated WebClient prompt construction and JSON parsing behind the POST /api/email/generate REST API endpoint.
- Built a Manifest V3 extension that detects Gmail compose windows and inserts backend-generated replies into live drafts.
- Delivered a React/Material UI client with tone controls, reply previews, and one-click clipboard copy for browser workflows.
